

Not all cars make you want to get up at 2am to drive them. A Golf, though, isn't like all cars. Maybe it's the 70 metres of laser-welded seams on the bodywork. Maybe it's the multi-link rear suspension. Or it could be the electromechanical 'self-learning' steering system. Whatever it is, there's something so excitingly precise about the way a Golf handles, you'll find the chance of having the road to yourself just too good to miss.
